

Waste container battery assortment

Batteries and accumulators

WWW.TAURAC.COM

Introduction

The underground container is rapidly gaining ground among businesses and municipalities due to its highly efficient way of collecting and separating waste. The underground container makes the cityscape more beautiful and cleaner and increases safety.

Difference between the various systems for waste containers

Underground containers are available in different types and sizes. Taurac supplies replacement batteries for underground waste containers that use the technology of BWaste, Mic-O-Data, Sulo, VConsyst and WSS.

In addition, we have the possibility to completely overhaul your existing housing of Mic-O-Data and VConsyst completely overhauled and provided with a new battery.

Battery powered underground waste container

Many underground waste containers use a system. That system can be used for electronic access provision, data registration and communication with battery power. The system provides access control and fill level measurement for (underground) waste containers to which only residents have access by means of a card or key. The system often runs on a battery for a few years. Because the system works on battery power, a connection to the public electrical grid is not necessary.

The flexibility of the access system is determined in part by the battery power. The battery allows the placement of the container without connection to the mains. After some time, the battery will need to be replaced. Taurac offers a wide range of replacement batteries for a BWaste, Mic-O-Data, Sulo, VConsyst and WSS skip. Also systems which keep the batteries in good condition via solar technology are available from Taurac's extensive range!

Advantages of Taurac container batteries

- Same quality as original battery, but in terms of pricing very economical
- Cells in the battery are identical to an original battery
- Dimensions of the housing are identical to an original battery
- Delivery of products from own warehouse
- 1-on-1 personal contact for optimal service

Assortment

Container batteries for underground waste container systems

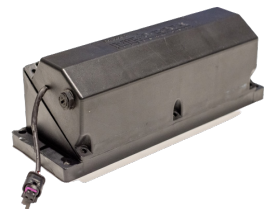

CON125L

12 Volt / 5200 mAh XX battery suitable for Mic-O-Data system with solarcell

CON10LIPL

10,8 Volt / 43,5Ah lithium battery of Mic-O-Data with lower plate

CON10LI

10,8 Volt / 43,5Ah lithium battery of Mic-O-Data revised

CON1429L

14.4 Volt / 2900 mAh lithium battery suitable for VConsyst Chiplock®3.0

CON1429E

14.4 Volt / 29 Ah lithium battery of VConsyst Chiplock® 4.0 revised

CON1818

18 Volt / 18Ah alkaline battery suitable for BWaste

CON2472

24 Volt / 72Ah alkaline battery suitable for Sulo

CON1210

12 Volt / 10Ah lead battery suitable for WSS

CON1316

13,5 Volt / 16,5Ah alkaline battery AlkVarta D-cel wired without plug

CON125L

12 Volt / 5200 mAh lead battery
suitable for Mic-O-Data system with solarcell

Specifications		
Reference	Unit	Specificatons
Article ID	-	CON125L
Voltage	Volt	12
Amperage	mAh	5200
Chemistry	-	Lead
Suitable for brand	-	Mic-O-Data - art.nr. 90.400.013-1
Warranty	Months	12

©2022 Technical data, dimensions and weight are subject to change. Errors and changes reserved.

CON10LIPL

10,8 Volt / 43,5Ah lithium battery
suitable for Mic-O-Data

Specifications		
Reference	Unit	Specifications
Article ID	-	CON10LIPL
Voltage	Volt	10,8
Amperage	Ah	43,5
Chemistry	-	Lithium
Weight	KG	1.070
Suitable for brand	-	Mic-o-Data
Warranty	Months	12

©2022 Technical data, dimensions and weight are subject to change. Errors and changes reserved.

CON10LIPL

Your current battery for the Mic-O-Data revised.
Equipped with a new 10,8 Volt / 43,5Ah lithium battery.

CON1429L

14,4 Volt / 29Ah lithium battery
suitable for VConsyst Chiplock® 3.0

Specifications		
Reference	Unit	Specifications
Article ID	-	CON1429L
Voltage	Volt	14,4
Amperage	Ah	29
Chemistry	-	Lithium
Weight	KG	1.000
Suitable for brand	-	VConsyst
Warranty	Months	12
Certificates		CE / ISO 9001

©2022 Technical data, dimensions and weight are subject to change. Errors and changes reserved.

CON1429E

Your current battery for VConsyst Chiplock® 4.0
revised and equipped with 14,4 Volt / 29Ah lithium battery

Specifications		
Reference	Unit	Specifications
Article ID	-	CON1429L
Voltage	Volt	14,4
Amperage	Ah	29
Chemistry	-	Lithium
Weight	KG	1.250
Suitable for brand	-	VConsyst
Warranty	Months	12
Certificates		CE / ISO 9001

©2022 Technical data, dimensions and weight are subject to change. Errors and changes reserved.

For the VConsyst 4.0 we can also supply a separate battery pack.
The installation of this battery pack can easily be carried out independently.
Ask our consultants for more information.

CON1818

18 Volt / 18Ah alkaline battery
suitable for BWaste

Specifications		
Reference	Unit	Specifications
Article ID	-	CON1818
Voltage	Volt	18
Amperage	Ah	18
Chemistry	-	Alkaline
Weight	KG	1.690
Suitable for brand	-	BWaste
Warranty	Months	12

©2022 Technical data, dimensions and weight are subject to change. Errors and changes reserved.

CON2472

24 Volt / 72Ah alkaline battery
suitable for Sulo

Specifications		
Reference	Unit	Specifications
Article ID	-	CON2472
Voltage	Volt	24
Amperage	Ah	72
Chemistry	-	Alkaline
Weight	KG	8.960
Dimensions	mm	250x145x145
Suitable for brand	-	Sulo
Garantie	Months	12

CON1210

12 Volt / 10Ah lead battery
suitable for WSS

Specifications

Reference	Unit	Specifications
Article ID	-	CON1210
Voltage	Volt	12
Amperage	Ah	10
Chemistry	-	Lead
Weight	KG	3.500
Measurements	mm	152x98x98,4
Connection	-	WSS Connector
Brand (original)	-	Sonnenschein
Suitable for brand	-	WSS
Warranty	Months	12

©2022 Technical data, dimensions and weight are subject to change. Errors and changes reserved.

CON1316

13,5 Volt / 16,5Ah battery AlkVarta
D-cel wired without plug

Specifications		
Reference	Unit	Specifications
Article ID	-	CON1316
Voltage	Volt	13,5
Amperage	Ah	16,5
Chemistry	-	Alkaline
Weight	KG	1.26
Measurements	mm	152x98x98,4
Connection	-	Wired without plug
Brand (original)	-	Varta
Suitable for brand	-	-
Warranty	Months	12

Your Taurac dealer in the Benelux: Raca Group B.V.

RACA takes care of it!

As a wholesaler, RACA is a specialist in supplying lighting products, batteries and accumulators. Among other things, RACA supplies LED panels, downlights, highbays, skylights, waterproof fittings, emergency lighting batteries and accumulators. RACA supplies these products to companies operating in various growth sectors such as the installation sector, educational institutions, the medical sector, the construction sector and waste processing. Most of the products are delivered from our own warehouse, which means that fast delivery is possible.

Answering the questions of tomorrow

Years of experience, knowledgeable staff and user-friendly products provide solutions that can answer tomorrow's questions.

Customers appreciate the personal service and solution-oriented way of thinking. All this with the aim of being able to realize a tailor-made solution for every project.
